Introduction

Project explanation with your own words.

2+2

[1] 4

The project

Project development including the code and emphasizing the main difficulties and most important parts.

Results

Numerical results, quality assessment of the approximations, and time efficiency of the algorithms.

Conclusions

About the results, how the difficulties were solved, and possible alternative approaches. Keep the focus, the conclusions must be as brief as possible.

References

Including textbooks, webpages, and class notes.
